Commissioner of Health William R. Archer III, M.D., and Executive Deputy Commissioner, Patti J. Patterson, M.D., M.P.H., gave of their time to assure that the study and long range plan fit the public health mission and goals of the agency. Numerous external clinical and other stakeholders provided valuable input. We would be remiss not mentioning TDH's assistance in sharing their research, clinical, and architectural material which formed the foundation for this study. It is our hope that each participant will find this report to be materially beneficial to TDH's public health mission.

We would also like to acknowledge budgetary support from Diane Simpson, Ph.D., M.D., Associate Commissioner of Disease Control and Prevention, and Debra Stabeno, Associate Commissioner of Health Care Delivery.

Also assisting as a subcontractor to Tonn and Associates was Mr. Sam Alam with Health Facility Consultants, Inc., who assisted with the facility design and analysis components of this study.
